

ABHYODAY KUMAR

AI ENGINEER

Bengaluru | Abhyodaysingh993@gmail.com | [LinkedIn](#) | 7903588617 | [Github](#)

SUMMARY

Computer Science undergraduate at Jain University with hands-on experience in Full Stack Web Development and Artificial Intelligence, skilled in building scalable applications using React.js, Next.js, Node.js, and MongoDB, along with developing AI-powered solutions using Python, Machine Learning, and Generative AI. Experienced in API integration, real-world project development across EdTech, LegalTech, FinTech, and Healthcare domains, and deploying applications on modern platforms, with a strong focus on problem-solving and building user-centric, data-driven solutions.

TECHNICAL SKILLS

React.js, Next.js, Node.js, Express.js, Python, Flask, MongoDB, MySQL, Firebase, REST APIs, HTML5, CSS3, JavaScript, Tailwind CSS, Bootstrap, Git, GitHub, NumPy, Scikit-learn, Generative AI, Prompt Engineering, API Integration, Postman, Deployment

PROJECTS

Flood Detector

- Designed an AI-based flood prediction and alert system using real-time data from APIs and sensors
- Integrated mapping and alert features using open-source tools and Python Created a user-friendly interface for live updates and warnings in vulnerable regions

EduVerse – Rural Education Platform

- Developed an app to deliver educational content in rural areas with **offline access**
- Built features for downloading lectures and interactive modules using Flutter and Firebase
- Targeted hybrid learning: online where possible, offline where internet was limited
- Addressed issues of digital divide and content delivery in under-connected regions

Legalyze App

- Developed an AI-powered legal document analysis platform enabling users to upload and auto-summarize complex legal documents
- Integrated red-flag detection to highlight potential legal risks and concerns within documents
- Built natural language querying support allowing users to ask questions and gain legal understanding in plain language

Gullak– Financial Education Platform

- Created a financial literacy app designed for children aged 4–18 to learn money management concepts in an engaging way
- Incorporated games, quizzes, and interactive lessons to make financial education fun and accessible

AAROGYA AI

- This Flask-based application utilizes Gemini AI to provide rural health workers with preliminary diagnostic suggestions and automated triage recommendations.
- The platform allows users to capture patient symptoms through three integrated methods: voice recordings, physical image uploads, and manual text entry.
- The system assigns color-coded priority levels to cases and generates structured health records compatible with India's Ayushman Bharat Digital Mission (ABDM).

KAAMmitra - Your Work Friend

- The platform utilizes the Gemini API to intelligently connect clients with the most suitable skilled workers based on specific skills, location proximity, and user ratings.
- Designed for accessibility, the system integrates Twilio to send real-time job alerts via SMS, allowing workers to manage profiles and accept tasks with simple text responses.
- The project features dedicated portals for clients, workers, and admins, supported by a Flask backend and Supabase database with manual verification for trust and safety.

Startup Idea Validator

- Turn your raw ideas into market-ready ventures with smart validation tools.
- Get real-time feedback from a global community of innovators.
- Build with confidence using data-driven insights tailored for modern founders.

FixFox

- Automatically detects and resolves critical infrastructure failures like CPU spikes and memory leaks in real-time.
- Uses an Isolation Forest model to identify complex anomalies and predict outages before they impact users.
- Hibernates idle resources to maximize cloud savings while enabling chaos engineering to test system durability.

Portfolio

- Designed and developed a fully responsive portfolio website from scratch, showcasing my skills and projects.
- Focused on clean UI/UX and performance to create a seamless user experience across devices.
- Built independently, demonstrating my ability to plan, design, and deploy complete web solutions.

EXPERIENCE

Mobile Application Developer Intern

TAPnex | July 2025- Dec 2025 | India

- Built mobile app/website with role-based login and NFC payment integration.
- Used Firebase for user authentication and database storage
- Integrated UPI payments and streamlined volunteer workflows

Campus Ambassador

E-Cell, IIT Bombay | June 2025 – Dec 2025| Remote

PromingE-Cell events in our college

EDUCATION

Bachelor of Technology in Computer Science(2024-2028)

Aug 2024 - Jul 2028

- ❑ 1st Semester CGPA: 9.05 | 2nd Semester CGPA: 9.00 | Average CGPA: 9.025
- ❑ Completed foundational courses in Python Programming, Data Structures, and OOPS
- ❑ Participated in multiple national-level **Hackathons** and technical **Workshops**.

ADDITIONAL INFORMATION

Aug 2024 - Present

Languages: English, Hindi, Marathi
Certifications & Awards

- ❑ **Engineering & Technology Job Simulation**– Deloitte (Forage)
- ❑ **Software Engineering Job Simulation**– J.P. Morgan Chase & Co. (Forage)
- ❑ **Generative AI: Transforming Your Organization**– Google Cloud via Coursera
- ❑ **Winner – TagX**, Jain University
- ❑ **Top 50 Finalist** – BJS IT Hackathon
- ❑ **Secured 18th position** in Tutedude Web Dev Hackathon, PAN India.
- ❑ **Reached Level 3** – IIIT Lucknow Hackathon
